

I am writing to express my support of this bill. HB4140 will require districts to be proactive in offering the accommodations necessary to students who have experienced a TBI or other type of brain injury. Students returning to school following a brain injury need accommodations, support and educated teachers. As a person who has experienced a TBI I understand the impact that a caring and flexible work/school environment can make.

Thank you for your consideration of this Bill.

Sincerely,

Laura Linda Negri-Pool
