HB4067 is a crock-o-crap that has nothing to do with justice or the environment. Really? "Environmental justice," "Environmental justice communities," "differential energy burdens on low-income customers and other economic, social equity or environmental justice factors that affect affordability for certain classes of utility customers"

It is obvious that this bill just targets political groups and fractures the electorate into smaller more manageable groups thru racism and social/economic status.

Policy developed by career bureaucrats that are unaccountable to the voters is a way for a small group of supposed "representatives" to force an agenda that they know is untenable in an open forum.

HB4067 is a bad idea for Oregon.
