Subject: SB 1530; SB 1574
Date: Tuesday, February 4, 2020 2:18:43 PM

I am writing in opposition to SB 1530 and SB 1574. Both of these bills are riddled with political goals, more so than environmental protection. While I have no PhD after my name, I have done considerable research studies on this matter. Clearly, there is no "climate crisis", from the scientific research I have read. In fact, many climate scientists are questioning the actual cause of global warming. Scientists who are actively studying climate change, and not reading summaries of others. Perhaps the sponsors of this bill will explain the effects of Pacific Decadal Oscillation. Scientists, whose research I have been following are: Dr. Willie Soon; Dr. Elliot Bloom; Dr. Dan Britt; Dr. Fred Singer; Dr. Ray Spencer; Dr. John Christy; Dr. David Deming; Dr. Ken Green, all of whom are preeminent scientists. If you care about the citizens of the State of Oregon, you will take the time to study the findings of these scientists, before voting on such draconian legislation.

This proposed legislation will destroy the lives and livelihoods of many thousands of Oregon citizens. Before destroying the lives of Oregon residents, please take the time to educate yourself on what is actually happening with global warming. You will find there are far more questions than answers. Take the time, before destroying lives. The research of these scientists have me convinced there is adequate time for honest research. Doing that which is right is usually more difficult than taking the easy route. Thank you for considering my request. Please vote no on SB 1530 and SB 1574.
