I am writing in support of HB 4069. It is common sense that if Oregon is going to effectively manage its water resources, then it needs accurate data, including measurement and reporting from all involved entities. HB 4069 is simple and straightforward and would require that water usage be measured and reported. Please support this bill which would enhance Oregon's efforts to effectively manage this increasingly important resource due to climate change and other variables including increasing demand for clean water.

Sincerely,  
Kathleen M. McNeill
