Subject: Climate change legislation
Date: Tuesday, February 4, 2020 10:56:45 PM

As a parent, grandparent, small business owner, I have many reasons to be extremely concerned about the future of my state, my country, and my planet. Legislators must stand strong behind legislation which serves to protect our environment for generations to come. Climate change is mreal. Stand for that, and those, who have no voice. Our air, water, land, plants, and animals. Our children.

Thank you.

Every day when we wake up, we have a choice. Will we choose fear or will we choose compassion and love?
