

To whom it may concern,

I have only been a student at IOT for a little under a month but my experience here has already been amazing. The teachers and staff are all extremely caring, knowledgeable, and dedicated to helping students succeed. They provide many services and resources for students including a clothes closet, food pantry, a ride-share program, and tutoring. I chose to come to IOT because I appreciate and learn best in a small class environment, I love that the program is accelerated, & the job placement program upon graduation will be extremely valuable.

The Medical Assistant program at IOT has already taught me many valuable skills and I am sure I will continue to gain knowledge that will benefit me for the rest of my life. Many veterans struggle with deciding what career path they want to take after leaving the military which is something I had trouble with as well. IOT provided me with a solution and a career opportunity that I can obtain in less than a year. I am very grateful to have this opportunity and I would hope this program will continue to be available to veterans who may want to attend IOT in the future.

Sincerely,

Cheyenne Saverino
