Subject: Please pass strong climate legislation
Date: Wednesday, February 5, 2020 12:43:43 PM

Dear Oregon State Senators-

I am writing to urge you to pass strong climate legislation as soon as possible.

I am a fourth generation Oregonian who loves this state, and everything it has to offer from clean air and water, to beautiful forests and coastlines. I love that people can make a livelihood off of the resources of this state. I am concerned that the management of our resources is threatened by climate change, due to decades of unmitigated dumping of carbon pollution into our atmosphere. We have only started seeing the devastation that this will wreak on our natural resource industries and our communities who struggle with consistent and long term supplies of water. The crab industry is one such industry that is starting to see the earliest of the effects of ignoring climate change, as reported recently in the Oregonian.

The other threat of climate change is surges in human migration to Oregon. I personally think there are enough people here. We don't need to encourage them to come by blindly making the rest of the United States more and more inhospitable. Unmitigated climate change will also continue to cost tax payers through increased disaster spending bills. Please do the fiscally smart thing to do and plan for the future by taking out an insurance policy - Please pass strong climate legislation and send a signal to the rest of the country that it is time to DO SOMETHING.

Thank you.
Sincerely,
Daniela Brod
Washington Co.
