To whom it may concern,

My family has worked in natural resources for generations including logging and fishing. My family has relied on the resources as their income and livelihood. If any of the resources are limited or restricted, many people around me including myself would be devastated. We rely heavily on the resources to keep our generations alive.

I grew up in a coastal community which was held up with any economy due to natural resources. If any restrictions apply to them, the communities would die.

The current community I live in is also heavily influenced by natural resources. Funding for my job is paid by farmers, ranchers, and citizens of the community that pay to help. I could lose my job if bills are passed.

Consider the devastation you would cause to thousands of Oregonians.

#timberunity

Thank you,
Jacob Woods
