Date: Wednesday, February 5, 2020 11:43:11 PM

Dear Senators,

I am a small businessman and City Councilor for the City of Keizer.

I am not a polished political lobbyist or cannot pour 1000's of dollars into trying to persuade you what to do.

Please take a second look at SB 1530.

Oregon has one of the cleanest air quality and livability in the nation. If we took all the people out of Oregon and there was no impact from humans, very little would change.

I see this as a big \$ grab. It will affect the poor and middle class the most, besides, there is no real plan for the money that would come in.

Don't burden farmers, loggers, industry and Oregon's most vulnerable people, the poor and middle class all for something which WILL NOT change our livability.

We cannot afford SB 1530 on Cap-and-Trade.

IF somehow, you really feel this is the right thing for Oregon, please put it to the voters. With something that would affect so very many, it would only be right.

Respectfully,

Dan Kohler
