I spent 34 years of my life working in the Timber Industry and raising my family.

The company went above & beyond in meeting reforestation standards. You may ask why? Because they care about the environment and are committed to being green and have been doing this for years before the more stringent requirements were placed on logging.
It's what "FARMING" trees is about.

These forest are what Oregon needs!!

NOT MORE TAXES!!!!!!

I urge you to stop this nonsense and listen to the 1000 of people on your steps in the morning!

We're not backing down.....

Please STOP Cap and Trade
