

SUBCOMMITTEE RECOMMENDATION

**Department of Administrative Services
Compensation Plan Report**

On February 4th, the General Government Subcommittee recommended acknowledging receipt of a report from the Department of Administrative Services on compensation plan changes.

The report outlines additional compensation plan changes for American Federation of State, County, and Municipal Employees at the Stabilization and Crisis Unit in the Department of Human Services. The only change being reported is creation of a new classification called Behavioral Professional, effective October 1, 2019. The main compensation agreement, which included the standard cost of living adjustments and the addition of a new top step, was reported on previously. This new classification was not included at that time because the related classification study was not completed during regular contract bargaining.

The General Government Subcommittee recommends approval.
