

As a constituent, I ask that you please oppose HB 4005.

HB 4005 would require law-abiding citizens to make their firearms unavailable for self-defense. Gun safety and storage is a matter of personal responsibility and every person's situation is different. It is unreasonable to impose a one-size-fits-all government solution. Such poorly thought out schemes are without any consideration for personal circumstances.

Firearm owners should not be held liable for the crimes committed by a person who has illegally obtained their firearm. Individuals should not be further victimized after experiencing a burglary or other loss.

As your constituent, I ask you to please stand with me and all other law-abiding citizens by opposing HB 4005. Please focus your time and resources on measures that will actually promote public safety, not bills that undermine our right to self-defense. This measure invades people's homes and forces them to render their firearms useless in self-defense.

Thank you.

Brian Girsberger
