Date: Thursday, February 6, 2020 2:27:35 PM

Dear House Energy & Environment Committee:

Covanta, Marion, Oregon's only municipal waste incinerator and 1 of the largest single emitters of greenhouse gases in the state, is trying once again to receive state renewable energy credits. If successful, this would take money away from new clean energy projects in order to give corporate welfare to a 33-year-old polluter with deferred maintenance needs.

Please stop dirty Coventa from getting clean energy money.

thank you,

Dr. Virginia Feldman MD, FAAP, Physicians for Social Responsibility,
Portland, Oregon 503 901 7329
