

This bill is not going to get irresponsible gun owners to lock their home defense guns up even if they have children. Defending their family in a timely manner against home invasion is their top priority. With the opioid epidemic running rapid there is a greater possibility of a desperate individual breaking into a home to steal anything of value to support their addiction. If your going to ignore the facts of towns and states that have restricted guns heavily and have not attained the goal they wanted. What does that say about you. As I have said in the past I will obtain the names of those who support these kind of bills and start to campaign against their reelection. Word of mouth can be very effective. Do your home work and vote responsibly. Thank You.
