

RE: SB1530

Dear Committee Members,

My name is Suzanne Moore, a resident at Westmoreland Union Manor, as a senior and a resident of Oregon for more than 25 years, I am proud of our state. Thank all of you for your service, but my concern now is our great state's resources and our health in the future. It is so important now to ensure the air, water and soil livability. Please help lead Oregon to a cleaner, healthier future. We must curtail the use of Fossil fuels and the most blatant overuse of dirty energy, Making HB 1530 stronger and tightening loop-holes within the bill, is the best way to curtail use of Carbon based fuel in Transportation, Infrastructure and home use. We can make this change.. but we need your help

Thank you
