To OUR elected officials;

Cap & Trade is NOT the answer to “climate change.” Evolution and Mother Nature are! Stop listening to “consensus” which is an opinion of a group of paid speakers and turn your attention to SCIENCE! In fact, look at charts and graphs by our own Oregon State University EXPERTS! Science cannot be changed, scientific method is proven not banter. Raising taxes and creating hype will NOT change climate.

What’s happening in “our government” is PURCHASED change. This will not change Oregon Co2 or improve the worlds output. What it will do is KILL farmers, loggers, small businesses and families! Our business will close and we will move out of this state if Cap & Trade passes! This is not a joke, it’s already being researched. What YOU elected officials are doing is killing Oregon. Families born and raised are leaving by the masses and we will too. Sadly we’re being taxed out of our birth state.

You said the Student Success Act wouldn’t touch the consumer, well I’ve received charges already from large corporations to our business as they pass the tax down to us. It will affect everyone and the effect will be loss to Oregon. We can not afford skyrocketing taxes on EVERYTHING we do for business and family (increased fuel, increased energy and replacing major appliances). STOP THIS BILL!

<i>Sub-total</i>	374.96
<i>Freight</i>	
<i>Estimated C.A. Tax</i>	1.50
<i>Total Amount</i>	376.46
