My name is Connie Abbott! My family came across the plains. They helped build this State. Sad to say most have fled to State for one more friendly to them. This bill will destroy my family with unneeded taxes. We have a small family farm that I help feed my family and neighbors with. But unfortunately you are trying to make it more costly. I care greatly about the environment my farm depends on it. Taxing us doesn't make it cleaner. Just gives taxes in the state coffers. Please let us vote to decide on something this big. We want a say.
