The negative effects these regulations will have on oregon business will be devastating. Many operations will be forced to relocate out of the state the boarder cities will loos enourmous amounts of sales. The negative effects on oregonians will be far greater than the "positive proposed effects". Oregon is already regulating so many companies employees and business owners out of the state this will.only make it worse. This is an issue that will affect enough people that this issue should discussed in a long session not rushed through
