

Hello,

I am writing today, to tell you how much I oppose SB1530. It is not right for this state. Taxing businesses and individuals is only going to lead to misery and poverty for the good people in small rural communities. This legislature has done nothing but tax us to the point that we can no longer survive. In other words, we cannot afford anymore of your solutions. If you are so sure about climate change I suggest you and the people around you start by leading by example. Instead of telling us how to live.

Sincerely,

Julie Ludington  
Sweet Home, Oregon.
