

February 11, 2020

Dear Members of the Oregon State Legislature:

I am writing this to you to explain who JM Eagle is, what we do, and how we will help the State of Oregon become one of the most sustainable and resilient water infrastructure states in the US.

JM Eagle:

JM Eagle is a long-time manufacturer in the state of Oregon, Umatilla to be exact. JM Eagle established this plant over 20 years ago and has been known as the McNary plant. We have been servicing the great state of Oregon for over 2 decades with not only great products and service but supporting the local community with employment and local economic growth.

JM Eagle manufactures the widest array of high grade, high performance plastic pipe in the industry, and also offers a steady flow of innovative products. McNary is one of our main plants where we produce innovative plastic pipes that are designed to withstand corrosion and our AWWA pipes manufactured there are backed by an unprecedented 50-year warranty.

JM Eagle has produced millions upon millions of miles of plastic pipe for all necessary applications from potable water, sewer and drain, oil and gas, and electrical and data communications for both the public municipalities to the private sectors and government entities.

Plastic pipes are becoming the standard for maintaining a sustainable and resilient infrastructure moving into the future. Plastic pipes are extremely strong, environmentally friendly, and extremely cost effective for all, from the organization installing it to the end-user, our taxpayers. Plastic pipes are the only pipes that have a consistent flow rate that

never changes. Plastic pipes are the only pipes that have a life cycle of 100 years plus, all the while never hurting the environment nor those it services to.

JM Eagle has been and remains committed to our core value of delivering life's essentials through the most eco-friendly plastic pipe products on the market. We pride ourselves on being able to illustrate the vital role our products play in improving and maintaining the health and quality of life throughout the world. We will continue to manufacture plastic pipe to serve the world's growing needs.

And we do this all with respect for the beauty and fragility of the world and the well-being of its inhabitants, ensuring that our business makes a positive contribution to the environment, the communities we serve, our customers, and our employees.

JM Eagle understands better than most the importance of supporting the local communities not only with employment opportunities, but consistently growing the local economy by producing and selling the very best products under our roof.

I urge you all to move forward with the decision to allow for "Open and Fair Competition" during a bidding process for water infrastructure projects in the great state of Oregon.

I am looking forward to your response!

Yours sincerely,

Marcus W. Min
