House Interim Committee on Energy and Environment
Chair, Karin Power
Oregon State Legislature
900 Court St., NE
Salem, OR 97301

Sent via email to: Rep.KarinPower@oregonlegislature.gov, hee.exhibits@oregonlegislature.gov

Re: Support for HB 4105

Dear Chair Power and Members of the House Energy and Environment Committee,

I write in strong support of HB 4105, which would take important steps to lessen public safety risks of oil trains by bringing Oregon's oil volatility standards up to speed with Washington's standards. This is a common-sense step for protecting Oregon rail communities who may be in the path of oil trains coming to Oregon, already.

Secondly, I support the bill's effort to limit the buildout of new, polluting, dangerous oil and gas projects on the lands and waters that belong to all Oregonians. Our public lands and waters have higher and better uses than expanding fossil fuel industry profits while destabilizing our climate and adding to public health and safety risks.

Please support HB 4105.

Sincerely,

(See following pages for names and additional comments of 850 people who signed to support this letter)

I love Oregon, even though I live in Salt Lake City, I urge you to protect the Columbia River and Planet Earth. A July 5, 2017, article in the Proceedings of the National Academy of Sciences identifies that Earth is in the midst of its sixth mass extinction episode: Biological annihilation via the ongoing sixth mass extinction signaled by vertebrate population losses and declines. The article concludes: '...Earth's sixth mass extinction episode has proceeded further than most assume. ... '(T)he proximate causes of population extinctions (are): habitat conversion, climate disruption, overexploitation, toxification, species invasion, disease, and (potentially) large-scale nuclear war ... '(T)he ultimate drivers of those immediate causes of biotic destruction (are),namely, human overpopulation and continued population growth, and overconsumption, especially by the rich. ...

Thank you for supporting HB 4105.
the Hocker Family Steve, Elliot, Noah
& Nathan Oregonians since 1990

Please help protect the planet and
the people.

THIS, like numerous other issues
(climate change, food labeling, gun
safety, immigration reform, prison
reform, education reform, short-term
lending regulation, healthcare
reform, banking regulation, opioid
regulation) remains a vexing problem
primarily due to corporations' ability
to curry favor with elected officials.
The corrupting influence of money in
our political system is undermining
our democratic traditions and
discouraging Americans from voting
and/or running for office. This
ominous development may well end
our experiment in representative
democracy unless we alter this
decades-long trend. For the sake of
the republic, we must amend the US
Constitution to state that
corporations are not people (and do
not have constitutional rights) and
money is not speech (and thus can be
regulated by state and/or federal
campaign finance laws). Short of
accomplishing this, no other reform

Those of us in Columbia County living near Port Westward or along the rail line that passes through five of our cities are depending on you to move this bill in its strongest form as soon as possible. The crude oil train fire in Guernsey, Saskatchewan, a few days ago reminds us of the peril, not to mention Mosier, Oregon, in 2016.

As someone whose family lives in Hood River, who takes Amtrak to visit them frequently, and who has seen exactly what can happen with these trains, I strongly urge you to do the right thing for the people, for the environment, and for basic safety and pass HB 4105.

Please protect our planet for all our children and those to come.

Oil trains pose a hazard to Oregon's clean water and beautiful forests. It won't be too long before our society as a whole realizes that clean water and air are far more valuable than oil. Please protect the public with this bill.

I share the concerns of the Columbia RiverKeeper organization.

Dear madams and sirs, We have been fighting the Jordan Cove pipeline for 15 years. Canada wants and needs a way to ship cheaply all the fracked gas in N Dakota/ Montana etc. and we should NOT FALL FOR THIS. If they want to destroy OUR public lands, then they should try building it in Vancouver port not OURS. This would kill fish, crab and shellfish nurseries by dredging. It will take priority over fishing vessels getting in and out, thus cramping our EXISTING ability to make an income. This MUST be addressed, PLEASE pass this bill, Thanks, Liz

Although I am a resident of Washington State, I urge you to support this bill. The entire Northwest region has been a focus for coal, oil, and fracking development in recent years and is at risk for environmental degradation. Please adopt these measures to protect the ecology of this part of the country. The tribes are looking for compliance on traditional treaties as well and this bill will move toward meeting environmental expectations.

313 Bev	Hedin	Portland	OR

I live in California and I remember the terror and outrage I felt and all the demonstrations I went to when an oil company was planning to expand and start running bomb trains through Sacramento and multiple other towns and cities. I and almost everyone I know lived and/or worked within the blast zone. There were thirteen public schools in the blast zone. Thankfully, we won. I support any and all legislation to make bomb trains safer, but what we really need is to ban any new fossil fuel processing and shipping facilities so that there will be no need for bomb trains in the first place. I find it outrageous that any government official would ever approve these things. In a country with a government that was truly responsible to its people, life would always trump profit. In this country Big Oil trumps life and all of us, not to mention the planet (we are in a climate crisis) are treated as

314 Grace	Neff	Albany	OR

Protect the National Scenic Area, our Columbia Gorge, from ecological disasters of the future.

This needs to happen now.

'bout time

Please support Bill HB4105

We support HB 4105 for the reasons above. We need to change completely the ways we have been doing things and we need the leaders to be brave enough to do what is best for the PEOPLE'S health and welfare. Do not be puppets of vested interests, such as the U.S. Senate in the recent impeachment trial.

Please vote to protect our future.

Go green!!! 🍏

374 Dr. E.	O'Halloran	Spokane	WA
------------	------------	---------	----

There is no time to lose. Please pass this.

We have scientific data and long standing evidence of the damage that will be caused by allowing such an action to occur. One of the key roles of government is to preserve public safety. Willfully ignoring clear evidence of an impending catastrophe is a dereliction of duty. Scientists have worked for decades to assemble an incontrovertible body of evidence related to our changing climate, and ignoring that information is insidious. Future generations' resources, health and prosperity is dependent on us acting immediately, significantly and broadly.

Our market system currently contains no legal or price mechanism for accounting for this impudent destruction of future human life by today,Äôs purveyors of fossil fuels, and thereby leaves today's polluters to deprive our children of their most basic Constitutional rights to life, liberty, and the pursuit of happiness. This will constitute both the greatest violation of human liberty intrinsic to a genuinely free society, and the greatest destruction of human life that our civilization has ever experienced. With the remaining time window for such a transition closing rapidly, there exists no margin for Oregon to procrastinate and entertain the self-interested dissembling from the fossil fuel companies whose moral horizon stops at their profit margins.

504 Laura	Nowack	Earlville	NY
505 Judy	Shively	San Diego	CA
506 Carol	Becker	Sherman Oaks	CA

Our entire fishing and seafood industries are declining because of the pollution caused by fossil fuel infrastructure. Large contaminating cargo ships contaminate our waters. Streams and rivers are threatened by the Jordan Cove LNG line. The spraying that logging has done has already decimated our fish populations. We don't want to see in Oregon what has happened to Australia due to their coal industry. We need our forest to hold carbon and cool fishing waterways. Please don't allow the propaganda and threats of the petrochemical industry keep you from doing what is right to keep Oregon healthy.

507 Ellen	Saunders	Manning	OR
508 Howard	Lepzelter	Bronx	NY

We must take back control from all carbon polluters that endanger our lives directly and indirectly.

Please do the right thing: Oil trains are a danger in every possible way; keep them away from our public and our lovely, clean public lands and water.

Oregon lags behind both California and Washington in environmental and safety standards. At the very least, our standards should be brought into parity with those of our neighboring states.

Please don't endanger our environment by transporting oil by train. There is such a danger of accidents. We have enough dangers to our environment without adding to them.

THIS IS REASONABLE!!!!!!

Outlaw the sale of new internal combustion vehicles. Mr. SDD, PhD

...keep it in the ground!

Building a facility that transports dirty energy products is something all of us do not need. Building a structure and a transport system to bring in oil, coal or any other dirty energy products are prone to spills. Infrastructure buildings do not last long and usually have faults built into them which breaks at the most infrequent rate that damages the environment and destroys areas for centuries. We do not want to ever see any building of this type of structure ever.

It is long past time for stopping the expansion of fossil fuel use! On behalf of my children, grandchildren and all the living creatures of Earth, I ask you to pass this bill! People and Planet BEFORE Profits and not the other way round.

We must safeguard all of our citizens wherever they live. This measure will be a positive step in the right direction.

No more oil trains thru Bellingham!
No more oil trains AT ALL!

As residents of Hood River, my family lives in the blast zone. Please step up to defend Oregon's families from these dangerous industries. The public should not be forced to pay the costs while the companies earn all the profits. It's important to distribute the risks and burdens more fairly. Thanks for your consideration of this important bill!

This is so important for the safety and future of our gorgeous Oregon.

We need dramatic, decisive, no-nonsense action on climate change. Something Oregonians are good at! We need to be in the lead to protect our beautiful state, and be a model for wise stewardship.

I live in Hood River, close to the last train derailment disaster in Mosier. We need do all we can to avoid a repeat of that type of accident! I am also an emergency physician working at Providence Hood River Hospital and I am keenly aware of the limits of our EMS and health care system to respond to such a disaster. Oregon lawmakers have a obligation to protect the health and safety of the citizens and environment of our beautiful state! Dr. Karen O'Neill Heinemann

It is time to make Oregon clean and green

I don't live in Oregon but I do visit there. We do not need any new fossil fuel development anywhere.

Oh this is a Great Idea! We should have passed a bill like this long ago, but now is the second best time. Please pass this bill. Everything that makes the climate and the atmosphere harder to pollute and sully makes living so much sweeter!

I urge you to vote for this critical bill. It is truely a matter of survival for us all. Do the right thing. Be on the right side of history.

I also think the state of Oregon should divest from any oil and gas investments!

How did we ever get to the point, in our history, of not putting safety first for our citizens, wildlife, lands, water, and air? Our public lands should never be used for products that are known to be volatile and dangerous. If fossil fuels are not transitioned within 10 years to clean, renewable energy, the carbon and methane emissions in our atmosphere will continue to linger for 100's of years and more, leaving a planet inhabitable for future generations. Not one more pipeline, not one more oil train, not one more barge, not one more refinery, not one more fracking well, NOT ONE MORE EVER!

Reining in fossil fuels is an important, ongoing effort.

Oregon is my neighbor. I support anything that can save my 5 year old sons life.

No more fossil fuel projects in Oregon period. Support HB 4105

773 Phil	Harris	Portland	OR	This legislation is overdue, and sets a floor, not a ceiling, for regulating fossil fuel-related activities in Oregon. It's a very useful first step, and should be passed without delay. Thanks you, Phil Harris
774 Carolyn	Savage	Olympia	WA	
775 Teresa	McFarland	Portland	OR	It is almost too late, but we still have time to save human life on earth if we act now. Please, NO OIL TRAINS!
776 Jennifer	Brace	Joshua Tree	CA	
777 Patricia	Baley	Las Vegas	NV	
778 Daniel	Hawley	Ketchum	ID	
779 Susan	Boyl	Gresham	OR	
780 Jeff	Obermeier	Portland	OR	Sounds like a common sense bill to me
781 Rebecca	Clark	Portland	OR	
782 Kerry	Noel	Clatskanie	OR	
783 Randy	Shonkwiler	Chicago	IL	
784 Sara	King	Auburn	WA	
785 Susan	Preston	La Crosse	FL	
786 Mary	Davis	Portland	OR	
787 Amanda	Moore	Portland	OR	I am very concerned by the political strength of the rail industry vs the people of Oregon and Washington when considering aligning protections along our rail lines. Please upgrade standards of safety, as well as update the vision of our future energy choices, to reflect a transition cogent to the current climate crisis. I support bold action to halt future oil and gas projects and hope that my voice be added to the many who also care about our energy future.
788 Mike	Krouse	Lakewood	OH	
789 Nancy	Hedrick	Portland	OR	I live not far from where the train runs through St. Johns. A catastrophic fire such as what happened in Mosier is a concern for me. Please do all that you can to address the climate crisis, including supporting this measure to rein in new fossil fuel development.

796 Dolly and Roy	Sutherland	Tacoma	WA	

Residents of the State of Oregon live and remain here for the state's beauty, and environmental surroundings. This bill would mean that the state continues to have undisturbed rivers, deserts, air, ground waters, wildlife habitats, marshes, and on and on. Residents here will never approve of fracking and off shore drilling. We have seen what these operations by foreign corporations have done to our waters and lands elsewhere.

797 Joann	Macey	Portland	OR
798 Hillary	Tiefer	Portland	OR
799 Abigail	Houghton	Seattle	WA

802 James	Spooner	Portland	OR
803 Evelyn	McMullen	Montgomery	AL
804 Lillian	Kraemer	Lakewood	CO

It,Äôs about time.

It is truly insane to keep producing-transporting-consuming fossil fuels! We know we MUST stop using them...why don't we do that?

805 Hank	Keeton	Scotts Mills	OR
806 Donald	DeGroot	Lakewood	CO
807 Michele	Penner	Bend	OR
808 Amanda	Dickinson	Yakima	WA
809 Keyaho	Rohlf	Astoria	OR
810 Mark	Hollinrake	New York	NY

Please support this bill

LET'S START USING COMMON SENSE REGARDING WHAT WE ARE DOING ABOUT RAIL TRAVEL WITH OIL. LET'S STOP RIGGING OIL DRILLS AND SWITCH TO ALTERNATIVE ENERGY WHERE JOBS WILL BE PLENTIFUL.

811 Jane	Church	Chapel Hill	NC
812 Annie	McCuen	Salem	OR
813 Maureen Stapler	Crowell	Grants Pass	OR

Do not endanger our water ways and wild lands

It's past time to start some serious course corrections away from end stage climate disruption. We see the effects every season, & they tend to manifest even worse than the careful scientists predict they will. Any step we can take should be considered, & the public interest should be protected whenever it can be. It seems to me that the only losers from this bill would be giant fossil fuel corporations who benefit from public rights of way. They are going to have to start moving away from producing this stuff & selling it abroad. Lets get on with it. Oregon used to be an environmental leader among the states, & now that is more important than it has ever been.

The Federal Government has proven ineffectual, incompetent, and unresponsive to our elected representatives or Oregonians. Time to take control and pass legislation that challenges their incompetence and arrogance!

837 Linny	Stovall	Portland	OR
838 Esther	Friedman		
839 Gary	McCuen	Salem	OR
840 Mark	Bradley	Sequim	WA

At the very least Oregon needs to match Washington, but better yet is to raise the bar and create even more rigid restrictions in order to keep citizens safe.

We do not need coal, we need safe energy like the sun

841 Tracy	Eberwein	Coos Bay	OR
-----------	----------	----------	----

Oil and gas does not belong near our waterways. The Jordan Cove and Pacific Connector Pipeline does not benefit Oregon, will destroy Oregon's natural beauty.
