

Senator Dembrow & Members of the Committee,

SB 1530 is not needed in Oregon. With our natural resources we already sequester our Carbon that is produced in the state.

My husband and I Farm in Azalea, OR we raise vegetables, sheep, hay and timber. The added tax would increase our fuel bill at least \$430 at a \$.22 increase. This wouldn't account for any raise in regular supply and demand.

The environment won't change just because we put a tax on the fuel use.

This also hurts our low income families. The state is already paying for many services and with increasing cost for natural gas and propane and fuel they won't be able to heat homes and pay rent they will loose hope and go to the streets. Which will be an extra burden on our state that is already fighting to find a solution to this epidemic.

I urge you to vote down SB 1530 and the 27 amendments also. Taxing the people doesn't absorb carbon but our forest and farm lands do.

Thank you,  
Mary Brady
