

I am writing in opposition to Senate Bill SB-1530

This bill, as written, will have little positive impact on our climate and way too negative of an impact on the citizens of Oregon through higher prices, exorbitantly increased taxes and the destruction of our natural resource jobs in timber, dairy, and fishing as well as our trucking companies.

We are recently retired, and are in a position to live out our lives, including normal inflation, without being a burden on our children or the welfare/medicare system. The passage of this bill could change that.

At the very least, turn it over to a vote of the people.

Sincerely,  
Christine Kell  
Tillamook, Oregon
