

I urge you to vote no on HB1530.

This bill will provide massive economic impact on some of our smallest and lowest income communities. Oregon is already one of the greenest states.

While improving our emissions and environmental impact is important, crippling our State's economy with massive taxes is not the answer.

I urge you to listen to all the citizens you represent, not just the ones with your party's letter in front of their names."

Thank you for doing the right thing,  
Aubrey Parr
