

I can't believe we have to beg and plead for our existence from the very people we elected to serve us. How many of these "in favor" testimonies are from people exempt from and/or set to profit from this bill? This bill has so many obvious flaws, how can you even consider something that takes so much away from so many and leaves YOU without having to account for the money or inform the public of any further test results? Why would a legitimate bill need that sort of clause? How can you be at peace taking American citizens right to vote away from them? We shouldn't have to go through this and it feels particularly useless as it is clear your minds are already made up. At some point all of you will be facing US begging for your place. If you allow this to happen to us that time may be sooner rather than later for many of you.

LET US VOTE!
