## Senate Environmental and Natural Resource Committee

As a rural Polk County forest landowner and hardwood sawmill owner I urge you to do all you can to pass SB 1530. It is an imperfect bill - I think not strong enough, others disagree. Our forest health is suffering significantly from climate change. We have lost over 10% of our Douglas Fir in the last decade due to longer, hotter, drier summers. The cost of inaction on climate legislation is much greater than the cost of some action. Please pass SB 1530. Our grandchildren will thank you and so will I.

Sincerely,  
Sarah Deumling
