

SUBCOMMITTEE RECOMMENDATION

**Department of State Lands
Land Administration System Replacement Report**

On February 10th, the Natural Resources Subcommittee recommended acknowledging receipt of a report from the Department of State Lands on the Land Administration System Replacement.

The Department of State Lands provided a written update on the status of the system replacement as required by budget note. The report provides a brief review of the project background, purpose, and scope and gives a listing of the completed project tasks to date. The agency has completed the hiring contract management services and is in the process of developing the documentation required for stage gate 2 approval in anticipation of issuing a request for proposals in late spring.

The report was also presented to, and reviewed by, the Joint Legislative Committee on Information Management and Technology, which adopted specific recommendations related to the report and transmitted those recommendations to the Joint Committee on Ways and Means.

The Natural Resources Subcommittee recommends approval.
