

# 4,348 OREGONIANS URGE CLIMATE ACTION NOW!

In just a few days following the end of the 2019 Legislative Session, 4,348 Oregonians signed a petition pledging to not give up on climate action and urging the Oregon Legislature to act on climate as soon as possible.

## To Oregon Legislators:

We have been let down by Oregon's leaders, but this is not the end of the road for climate legislation. We are not giving up, because climate change is the biggest crisis of our time. Inaction is not an option. **Today, I call upon Oregon's legislators to commit to climate action and a just transition, and to hold corporate polluters accountable.**

The Clean Energy Jobs bill was unfairly traded to the Senate Republicans in exchange for them returning to the Capitol. Despite the fact that the majority of Oregonians voted for candidates that included climate action and the Clean Energy Jobs bill in their platforms during the election, the voices of Republican Senators--and the corporations who funded their absence--are being held as more important.

The Clean Energy Jobs bill passed the House with a 36-24 vote, and it had the votes it needed to pass the Senate as well. **We were so close to passing bold climate legislation here in Oregon, until the bill was unfairly sacrificed.** Despite the voices of thousands of Oregonians who came to our rallies and lobby days; despite the young people who spent day after day at the Capitol speaking to legislators, asking for a healthy climate and a livable future; despite the overwhelming support for Clean Energy Jobs at the public hearings held earlier this year, Oregon's leaders didn't listen to us. They listened to the Senate Republicans. They gave in.

But that's not the way the story ends. **We're not going to give up on the climate.** We need climate action here in Oregon, and we're not going to stop until we succeed. Please pass a Clean Energy Jobs bill in 2019 or as soon as possible.

I call upon Oregon's leaders to take bold climate action now, and to put the demands of Oregonians over the demands of corporate polluters. **What we do now will be remembered for generations to come.** So let's be remembered--for stepping up, for making a just transition, for placing the responsibility on corporations rather than consumers, for leading the way in renewable energy, and for leaving a better world for those who come after us.
