Dear Committee,

My husband is 62 years old, we have 3 children at home one is trying to pay off college loans, one is in college and the other continuing the legacy of working in the Timber Industry. I need you to know how much Cap and Trade would hurt our family among so many others! People have been trying and trying to have their voices heard we don't want Cap and Trade, it WILL devastate families! I feel you have all lived your lifestyle maybe a little more within the City realm for so long...which is fine, but it does cause some people to lose touch with true reality of working class people and the struggles they have everyday! We all have different livelihoods that's a fact. But nothing should be implemented to impact people as hugely as this bill will. That is morally wrong! So I am going to beg and plea for you to please, please trust in your constituents who are striving everyday to help the environment with all these jobs that this bill will kill! Stop pursuing this bill! Please!!

Sincerely,

Sandy Kottre
