

I live in Cloverdale Or. we live off farm, logging, cheese making, beer making and fishing the ocean. What will this bill do that is a copy of SB 1530 (and HB2020 with some modifications) that has unknown effects on the rural area?

I have gone over all my bills and sit here going how the hell am I going to pay for something that is going to raise everything! My husband could even lose his job if this passes. Senators have tried to tell me that nothing will change price wise for all of us. I find this very hard to believe this.

Timber Unity has given you a 4 point plan on how to lower emissions with out costing us the tax payers a dime. Most of the state is on a tight budget we can not pinch a nickel and make a dime come out.
