

I am opposition of the Cap and trade bills being presented at this time. I am also in opposition of the manor in which this bill is being pushed through the government. This is a short session and this bill is not short session material. This bill needs to be rewrote with reality and facts in it's entirety and placed in front of the voters for them to decide how to move forward. We are who voted the politicians in to represent us and that is not happening with all the bait and switch going on. STOP write the bill as you want to present it SEND IT TO THE VOTERS.

If this bill is truly for the people and our environment then all outside our state should not be able to buy any of our state (land, credits or other) for any reason. This bill won't hurt the working families that feed us if it is to support our children. This bill won't make us conform to an unrealistic monopoly to exist. This is America we are free and have fought hard to be so. Stop selling us to a country that is not free and totally based on dictatorship. Especially when they are the majority of the climate problem with their own lack of control over their emissions and pollution.

I OPPOSE HB4167

Kendal Pelton
