Oregon Senators and Representatives,

We oppose HB4167 (and SB1530), cap and trade proposals that will cause significant harm to much of Oregon's citizenry. It will be most damaging to Oregon's natural resource industries, trucking, working Oregonians, Seniors and Veterans by forcing the increase of fuel prices and home utility costs.

It is a disgrace and contemptible that a proposal of this magnitude is being rushed/pushed/rammed through with very limited fiscal impact statement data, and no accountable revenue impact statement. This does not really address the carbon emissions issue. It is a TAX.

GIVE OREGONIANS A VOICE!!!!

Thank you for your consideration.
