

Hello everyone. My name is Gabriele Barta, I'm an aspiring produce farmer, currently I work as a hospitality temp.

I want to thank you for taking our climate emergency seriously.

I take public transportation, and as I wait for the bus, I am breathing in the fumes from all of the cars.

I went to Witch's Castle the other day to find some peace in nature. What I found was much more. It was as if my body was replenishing itself with clean air and sunlight, like a vitamin I was deficient in.

Clean air is vital for the wellbeing of everyone.

Also - My future farm is not immune to super storms. We have to move away from fossil fuels for the health and safety of all beings. It is our responsibility to protect the Earth and sustain life.

Thank you.
