I am writing to urge you to **support HB 4167**.

We are in the midst of a climate crisis: droughts, heat waves, and raging fires are clear signs of the "new normal". The main polluting industries and their political allies are maneuvering to slow or stop the legislative process, but they must NOT be allowed to prevail. This bill has had extensive work, input and public process over the past five years, and I urge you to support its adoption.

Thank you for your service.

Susan Koger, Ph.D.
