

I apologize if I got the number wrong.. I'm a woman of hope as far fetched as that maybe... that you will understand what I mean. On this note I oppose any n every bill you have written, have on stand by or in back up to pass any sort of Cap n Trade in Oregon. I base my decision on what has happened in California, the fact that we are already taxed into almost non existence, how I see our state handling the forests in thier control, versus the forests within our true stewards of the land loggers ,farmers and private land owners. I also oppose in light of recent events with our so called Governor who hypocritically ( to put it gently) wrote asking to destroy an awesome source of green power.. the Snake River Dams!! I would also like to add that those of you supporting this farce of legislation, the bait n switch games being played on the people who not only elect you into your position but also provide you with your paycheck to bow your head in shame...this whole game is an abuse of power and the trust your constituents put in you!!! Thank you for your time!!! I support my Senators in any opposition to any of these crazy livelihood killing bills!!!
