

I am a resident of The Dalles and am writing in support of HB 1530.

Cap-and-trade is an important measure that we need to fight climate change and even though it would only be in Oregon who knows what effect it might have on other states! The summer before last we were engulfed in smoke from surrounding fires. We have to do something big now!

“We are the first generation to know we are destroying our planet and the last one that can do anything about it”. WWF

Thank you, Sally Ford
