

Calling a legislative bill progress for the environment when it's really an excessive tax bill is completely unacceptable, misleading & a fraud.

23 of 36 Oregon counties have proclaimed they are against cap & trade!

Cap and trade will only hurt Oregon and all the reputable statistics out there on climate say it will make less than .001% difference and even if Oregon could reach 100% it would only make .01% difference but it would increase costs to the tax payer and serve no useful purpose except the government gaining more control over us and our money.

Remember this when a loaf of bread is \$10 and milk is \$15 because the trucks can't afford to run. Hope you enjoy \$6 a gallon for fuel and a 15% increase in your electric bill. I know many people who will be unemployed if crap and tax goes through.

We are headed for distraction and will be like commiefornia here soon.

With this much opposition & Oregonians demanding this issue be decided by "We The People" via a ballot vote, why such resistance?

What is the Oregon super majority democratic party hiding?

And who are you to decide Oregon citizens are not smart enough to act responsibly with voting on this bill/measure?  
Shame on you!!!
