

I am opposed to hb4167. Oregonians should be allowed to vote on taxes that will influence and effect their lives and livelihood daily.

I am an Oregon farmer and this will affect the cost of the goods I purchase to operate my farm. I do not set the price for my end products , grain seed etc so I cannot add the increase costs on to the end consumers as other businesses can. This will cost me a lot of money and could possibly put me out of business. Farmers operate on very slim margins which make it hard to make a living. Where will all the fresh local food come from in Oregon if legislature puts all the farmers out of business.

Do not pass hb4167

Voters should be allowed to vote on this or it should be deferred to the next full length session of the legislature so the bill gets the ample time for review this complex bill deserves .

Thank you Matthew Parker
