

Hi,

My name is Daniel Smith. I am a student at Willamette University, where I study Politics and Environmental Science. I am writing to urge you to pass HB 4167 as a vital step in addressing the global climate crisis. Opponents of this legislation ask why Oregon should take action now while other states and the Federal Government have not. Oregon should take action because the entire world has to take action now to fight climate change and its effects. We have the opportunity to be a leader in fighting for a live able future for my generation and those that follow. Action cannot come too early, but it can come too late.

Don't be too late. Vote yes on HB 4167.

Thank you.
