

House Committee on Revenue Oregon State Legislature 900 Court Street NE Salem, OR 97301

Dear Chair Nathanson, Vice-Chair Reschke, Vice-Chair Marsh, and Members of the Committee:

I am writing to you today on behalf of the Oregon Housing Alliance to express our support for the provisions related to affordable housing and homeownership, and the Oregon Individual Development Account (IDA) Initiative included in SB 1531A.

The Oregon Housing Alliance is a coalition of ninety organizations from all parts of the state. Our members have come together with the knowledge that housing opportunity is the foundation on which all of our success is built – individual success as students, parents, workers, and community members as well as the success of our communities. We represent a diverse set of voices including non-profit housing developers, residents of affordable housing, local jurisdictions, and organizations working to meet basic needs in every corner of our state. We believe that all Oregonians need a safe, stable, and affordable place to call home.

All Oregonians deserve a safe, stable, and affordable place to call home. Today, we simply don't have enough affordable homes for people who need them, and vacancy rates have dropped precipitously towards zero in communities across Oregon. People – our neighbors and members of our community – are struggling with homelessness, housing instability, rent burdens, and to make ends meet and put food on the table.

Local Option Affordable Housing Property Tax Exemption

The Legislature has authorized several property tax exemptions for affordable housing, including ORS 307.515 and ORS 307.540. Local option property tax exemptions are one tool local jurisdictions can use to help incentivize and make financially viable affordable housing developments in their communities.

Property tax exemptions for affordable housing are critical for several reasons. Exemptions recognize the importance of affordable housing to our communities, and provide an on-going financial subsidy to the project. Without property tax exemptions, local affordable housing developers would need additional resources to serve the lowest income members of our communities.

Communities across Oregon have adopted the property tax exemptions authorized under ORS 307.515 and ORS 307.540 to help ensure affordable housing is a part of our communities. Each affordable housing development that is built or rehabilitated using the exemption provides a safe, stable, and affordable home to people in the community with low incomes.

Recently, the federal government made a critical change that will allow for more people of different income levels to be served by affordable housing. This policy adopted by the federal government impacts the federal Low Income Housing Tax Credit (LIHTC), which is one of the main tools to develop

affordable housing in our communities. The policy, called income averaging, allows a development to serve people with higher incomes (up to 80% of area median income) if the property also serves people with lower incomes, and the average income of the property remains at 60% of area median income.

This change is critical. We need the most affordable homes for people with the very lowest incomes in our community, including seniors living on social security, people experiencing disabilities and people experiencing homelessness. OHCS has began implementing the income averaging policy, and we need our local option property tax exemptions to align with these new criteria.

The language included in SB 1531 A would raise the income limits served by these exemptions from 60% of area median income to 80% of area median income to align with the new federal definitions, if and only if the project is using this new federal flexibility. The change would allow local jurisdictions to have choice and flexibility about whether to allow this new policy in their community.

Home Ownership Limited Tax Exemption (HOLTE) Technical Fix

In addition to the local option property tax exemptions authorized for affordable rental housing, the Legislature has also authorized the Home Ownership Limited Tax Exemption through ORS 307.651. This exemption provides a limited property tax exemption for housing for purchase, which helps support the development of affordable homeownership and helps homeowners with limited incomes to afford a home.

Today, this important program is helping to support people with moderate incomes to access homeownership. However, there is a need for a small technical change to the program.

The current state enabling statute requires that from application, the development be completed within two years, without exception. Unfortunately, there are circumstances in which an affordable housing developer can be working hard to build the affordable home, and the process from acquisition of the land to funding to construction may last more than two years.

We are supporting the proposed technical fix which will allow a local jurisdiction, on a case by case basis, to grant an extension of this two year timeline if the applicant can demonstrate progress.

Oregon Individual Development Account (IDA) Initiative

The Oregon IDA Initiative helps Oregonians with low incomes across the state achieve their financial dreams by offering matched savings coupled with coaching and support buying a home, making an investment in education, starting a business, or reaching another goal.

Since its inception in 1999, the Oregon IDA Initiative has been funded by a state income tax credit. After changes at the federal level, the Oregon IDA tax credit is no longer a viable funding mechanism to achieve state goals. We are supporting the request from the Oregon IDA Initiative that the tax credit be allowed to sunset, as is included in SB 1531.

We urge you to support of SB 1531 A. Thank you very much for your time, and for your service to our state.

Sincerely,

alisa micht
