

To whom it may concern,

As SJR201 has been proposed, I would urge each individual involved to really think through this process. While the intention of this amendment may be in fact admirable on the surface, please think through what the consequences of just a ruling might have. This amendment would entitle any majority in power to rule over the choice of the people. This is not for the people by the people but rather by its very definition is for the people by those in power. This is not what Oregon's constitution was written for nor the United States of America constitution. By the very definition of this amendment is to invoke communist principles and power upon the very people that the Constitutions and our Representatives that these entities are supposed to represent not Rule.

I strongly urge you to rule against any such amendment such as SJR201 today and anytime in our future.

Respectfully,
Eric Stritzke
