- Current options to maintain minority party status
- Current party registration numbers and potential impact of proposed threshold
- Ongoing work to consider standards for political party status

**EFFECT OF AMENDMENT:**

No amendment.

**BACKGROUND:**

A minor political party can maintain ballot access in one of two ways: (1) maintain voter registration equal to .5 percent of the total number of registered electors in the state that are registered as members of the party; or (2) maintain a voter registration equal to at least .1 percent of the total votes cast in the state or electoral district for all candidates for Governor at the most recent election in which a candidate for Governor was elected to a full term; and at least once in a four-year period, receive at least one percent of the total votes cast for U.S. President or any candidate for statewide office.

When Oregon Motor Voter was adopted in 2015 (House Bill 2177), there was uncertainty about how the increase in registered voters would impact minor and major political parties and their ability to maintain access to the ballot. In 2016, the Legislative Assembly set specific dates prior to the operative date of Oregon Motor Voter for minor political parties to use when determining ballot access for a certain period of time. Senate Bill 224 (2019), the omnibus election-related bill, extended the sunset date for determining minor political party status from November 6, 2018, to November 3, 2020.

House Bill 4026-A reduces the number of electors who must be registered as a member of a minor political party in order for the minor political party to retain political party status from .5 percent to .25 percent of the total number of registered electors in the state for purposes of the 2022 and subsequent elections.
