Allied Health Programs

BASIC HEALTH CARE

The Basic Health Care Certificate is a great place to start your journey. The BHC prepares students for entry-level work in the health care industry and provides a diverse range of specialty track electives which help guide students toward completion of an additional degree or certificate.

DENTAL ASSISTANT

A dental assistant is the one who greets the patient as they go into the dental office for treatment. Often being the person who helps the patient who is a little afraid, become more comfortable. They work closely with the Dentist to provide quality care for the patient.

MEDICAL ASSISTANT

Medical assistants are the face of medical offices and often the first people with whom patients come into contact. They may perform basic medical coding and billing, scheduling, and patient flow and triage. Other duties may include waive testing, phlebotomy and specimen collection. Medical assistants are responsible for recording patient information into the electronic medical records systems

MEDICAL OFFICE ASST.

Medical Office Assistants are highly sought-after in today's growing medical field. They help to maintain efficiency in a medical office, help with scheduling laboratory visits and communicate with insurance companies. The projected growth in this industry is 23% by 2024.

PHARMACY TECHNICIAN

Pharmacy technicians assist pharmacists with duties that impact patient care and safety. Core responsibilities revolve around filling prescriptions for customers, including the mixing, measurement, counting, and recording of prescribed quantities and dosage levels.

PHLEBOTOMY

Phlebotomists work in hospitals, clinics, and other medical facilities drawing blood from patients in preparation for medical testing. In just one term you can earn your Phlebotomy Technician certificate and be working in the medical field as a phlebotomist. Phlebotomy is often an excellent stepping-stone to other careers in health care such as medical assisting.
