APPROACH

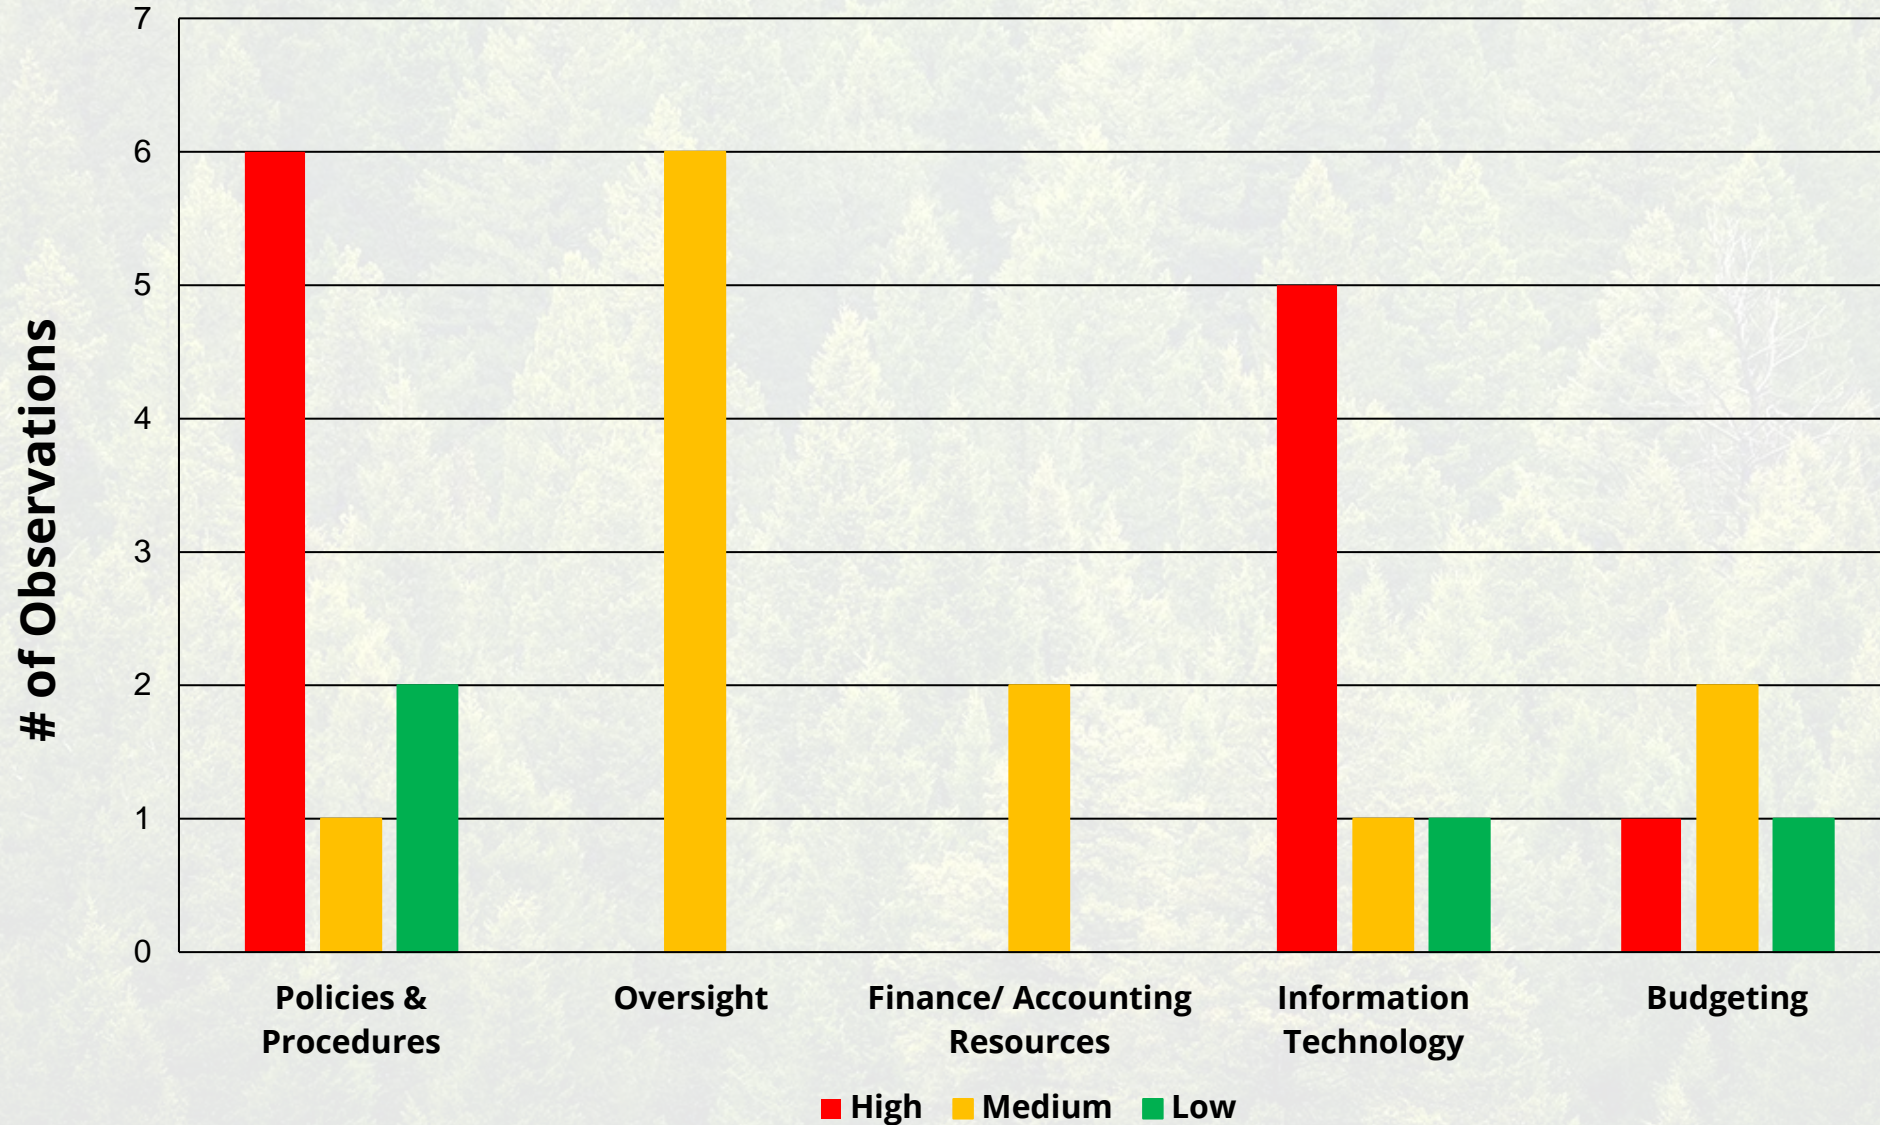

Risk Ratings

| Rating | Definitions |
|----------------------|---|
| <p>High</p> | <ul style="list-style-type: none"> • Design of controls is ineffective in addressing key risks or no process exists to manage the risk. • Controls/policies/procedures documentation is incomplete, unclear or outdated, not monitored and/ or does not exist. • Controls are not in operation or have not yet been implemented. • There is non-compliance with laws/regulations/policies/procedures and there are opportunities to develop new controls to provide a more appropriate level of assurance. • Immediate need for corrective and/or improvement actions to be undertaken. |
| <p>Medium</p> | <ul style="list-style-type: none"> • Design of controls only partially addresses key risks and does not provide adequate assurance that all objectives will be achieved. • Controls/policies/procedures are documented, up-to-date, and monitored, but there are some gaps in the documentation relied upon to provide evidence that the key controls are operating effectively. • Controls are not operating consistently and/or effectively or have not been fully implemented. Identified general compliance with laws/regulations/policies/procedures with a few minor exceptions. • There are some opportunities to improve existing controls, strengthen compensating controls and/or awareness of the controls. • There is a cost/benefit advantage to implement improvement opportunities. |
| <p>Low</p> | <ul style="list-style-type: none"> • Design of controls is adequate in addressing key risks, providing a reasonable level of assurance that objectives are being achieved. • Controls/policies/procedures are documented, up-to-date, and monitored. • Controls are fully implemented and operating effectively and efficiently. • Identified high level of compliance with laws/regulations/policies/procedures. • Some improvement opportunities have been identified but not yet actioned. |
