Information Management
and Technology**

Sen. Chuck Riley, Senate Co-Chair
Rep. Nancy Nathanson, House Co-Chair
Sen. Betsy Johnson
Sen. Brian Boquist
Rep. Pam Marsh
Rep. Bill Post

To: Joint Legislative Committee on Information Management and Technology

From: Sean McSpaden, Legislative Fiscal Office

Date: May 19, 2021

Subject: SB293 – Relating to information technology; prescribing an effective date.
Work Session Recommendation

Senate Bill 293 directs office of the State Chief Information Officer (CIO) to prepare recommendations for elevating consideration of privacy, confidentiality and data security measures in the design, delivery and management of enterprise and shared information technology services for state government, and submit recommendations in a report to interim committees of Legislative Assembly related to government accountability and information technology by September 15, 2022.

Under the measure, the recommendations shall consider and address (among other topics), the merits of either establishing and appointing a dedicated state privacy officer within the office of the State CIO to manage and oversee information protection and privacy guidance for state government, or continuing to delegate such duties to the Chief Data Officer, established via HB 3361 (Chapter 720, 2017 Laws), or another officer within the office's current management team.

If passed into law, the measure would take effect on 91st day following adjournment sine die and sunset on January 2, 2023.

A public hearing on the measure was held during the Joint Legislative Committee on Information Management and Technology's meeting on March 31, 2021.

The proposed measure has been determined to have a minimal expenditure impact.

Materials related to Senate Bill 293 are posted on OLIS.

Final Committee Action

SUGGESTED MOTION: I move that Senate Bill 293 be reported out do pass. (VOTE)
