#### BACKGROUND:

According to the U.S. Census Bureau's American Community Survey five-year estimates from 2013-2017, homeownership rates are significantly lower for communities of color in Oregon than for white people. Among Oregonians of color, the homeownership rate is 32 percent for Black or African American, 45 percent for American Indian/Alaskan Native, and 40.8 percent for Hispanic or Latino, compared to the white homeownership rate of 65 percent.

In 2018, the Legislative Assembly enacted House Bill 4010, which established the Joint Task Force on Addressing Racial Disparities in Home Ownership. The task force was directed to compile data, identify barriers, investigate mortgage practices, and recommend solutions regarding homeownership among people of color in Oregon. In a report to the Legislative Assembly in September 2019, the task force provided policy recommendations, with topic areas including: addressing racial disparities in homeownership; addressing educational, occupational, or income disparity barriers; addressing the housing system, lending, land use, or supply; and homeownership barriers controlled or regulated by the federal government.

House Bill 4003 (2020) proposed the extension of the task force, but the bill was not enacted.
