

SUBCOMMITTEE RECOMMENDATION

HB 2075 Relating to radiation

To: Ways and Means Full Committee
From: Human Services Subcommittee
Carrier: Representative Nosse

HB 2075 modifies eight fees related to radiation devices and equipment including industrial or veterinary X-ray tube fee and tanning device registration. The Oregon Health Authority anticipates that this measure would increase fee revenue by \$1.4 million Other Funds each biennium. Should this measure not pass, OHA forecasts a funding deficit in their Radiation Protection Services program in 2021-23.

The Human Services Subcommittee recommends HB 2075 be reported out do pass.
