Analysis:

SB 12 - A directs the Oregon Health Authority (OHA) to conduct a study of the possibilities for importation of pharmaceuticals from Mexico and Canada for public employees, and the possibilities for health insurance coverage for public employees to travel to Mexico or Canada to get pharmaceuticals. The results of the report are to be submitted to an appropriate committee or interim committee of the Legislative Assembly no later than September 15, 2022.

The Public Employees' Benefit Board (PEBB) and the Oregon Educators Benefit Board (OEBB), which administer health care plans for state, higher education, and K-12 school employees, would conduct this study. Costs are estimated at \$80,000 to \$120,000 Other Funds, with half paid by PEBB and half by OEBB. PEBB's costs are supported by the premiums paid by state agencies and universities, and the costs for OEBB are supported primarily by the premiums paid by the K-12 school system.

This measure warrants a subsequent referral to the Joint Committee on Ways and Means for consideration of its budgetary impact.
