## House Bill 2654

Sponsored by Representatives SMITH DB, MARSH, Senators BEYER, FINDLEY; Representative OWENS (Presession filed.)

## **SUMMARY**

The following summary is not prepared by the sponsors of the measure and is not a part of the body thereof subject to consideration by the Legislative Assembly. It is an editor's brief statement of the essential features of the measure as introduced.

Authorizes electric utility to use or allow for use of electric easement in provision of broadband services. Provides process for property owner to bring action for damages if use in provision of broadband services results in expanded use of easement.

## A BILL FOR AN ACT

- 2 Relating to use of easements for provision of broadband.
  - Be It Enacted by the People of the State of Oregon:
    - **SECTION 1. (1) As used in this section:** 
      - (a) "Broadband" has the meaning given that term in ORS 276A.406.
    - (b) "Electric easement" means any recorded or unrecorded easement or license, including easements created by operation of law, held or used by an electric utility for the installation and maintenance of electric facilities, regardless of whether the easement is for the exclusive benefit of the electric utility or is also for use in connection with other utility services that may or may not be provided by the electric utility.
    - (c) "Electric facilities" means any line, wire, pipe, conduit, main, pump, pole, tower, fixture, manhole, handhole or other similar facility or facilities, and any other related or ancillary materials, which are owned or controlled, in whole or in part, by one or more electric utility.
      - (d) "Electric utility" has the meaning given that term in ORS 757.600.
    - (e) "Property owner" means a person with a recorded fee simple interest in land upon which an electric easement is located.
    - (2) An electric utility may use or allow for the use of an electric easement in the provision of broadband services. If the use of an electric easement in the provision of broadband services would result in an expansion of the uses for which the easement is granted or acquired, the electric utility must, no later than 60 days prior to the expansion of use, provide written notice to the property owner pursuant to subsection (3) of this section.
    - (3)(a) Written notice as required by subsection (2) of this section must be sent by first class mail to the last known address of the property owner, by a printed insertion in the property owner's electric utility bill or by other commonly used publication or communication channels employed by the electric utility. The notice must contain:
      - (A) The name and mailing address of the electric utility;
    - (B) The mailing address, telephone number and electronic mail address for a representative of the electric utility; and
      - (C) A summary statement of the purpose and character of the expansion of the use of

the easement.

- (b) If the activities necessary to expand use of the easement for provision of broadband services will require trenching or other underground work that is not included in the uses for which the easement is granted or acquired, the notice provided under this section must also include:
- (A) A summary statement describing the activities to be conducted during the trenching or other underground work; and
- (B) The approximate dates when the trenching or other underground work will start and end.
- (4) Except as provided in subsection (7) of this section, a property owner that receives notice under subsection (3) of this section may bring a cause of action, in the circuit court of the county where the electric easement is located, against the electric utility for damages relating to a decrease in the value of the property owner's real property caused by the use of the easement in the provision of broadband services. A cause of action authorized by this subsection must be brought no later than 18 months after the date that the electric utility provided notice under subsection (3) of this section. If a cause of action is not commenced within the period set forth in this subsection, the expanded use of the electric easement by the electric utility is deemed vested and shall run with the land.
  - (5) In an action commenced under subsection (4) of this section:
- (a) The court or jury shall ascertain and assess the decrease in value of property, if any, based on the difference between:
- (A) The fair market value of the entire parcel of real property upon which the electric easement is located immediately before the expanded use; and
  - (B) The fair market value of the entire parcel immediately after the expanded use;
- (b) Evidence of revenues or profits derived from the expanded use or related attachment rates are not admissible in determining fair market value;
- (c) Evidence of the increase in fair market value due to the availability of broadband services is admissible in determining fair market value; and
  - (d) Neither party is entitled to recover appraisal and other expert costs or attorney fees.
- (6) An expansion of use subject to an action commenced under subsection (4) of this section is deemed vested and shall run with the land as of the date that moneys have been fully provided in payment of all damages awarded in the action. The electric utility may include required reimbursement for expanded use compensation awards and litigation costs in any attachment license agreement with a provider of broadband services that is not the electric utility and that is benefited by the expanded use.
- (7) A class action may not be maintained against an electric utility in any action for damages based on a claim of expanded use for broadband services.
- (8) This section does not alter the rights of an electric utility to acquire the rights to use real property for broadband services through any other means authorized by law.
- (9) This section does not authorize an expanded use that is expressly prohibited by the terms of a written utility easement.
- (10) Nothing in this section requires an electric utility to initiate the expanded use process at the request of a provider of broadband services that is not the electric utility.
