

As an Oregon resident since birth I've traveled between here, Mexico and Colorado and just about everywhere in between on Motorcycle.

I have seen motorcycle filtering in traffic reduce the danger of motorcycle both to riders and drivers. For the riders, otherwise small traffic accidents such as rear end collisions can prove fatal or in the least life-altering. In the summer, being trapped in urban traffic can pose unhealthy both in exposure to heat and carbon monoxide.

Please consider making the roads safer for us motorcyclists.
